Welcome to Meat Products Information System.

1. **Add a Product (Button)** – Takes the user to product adding form.
   1.1. Meat ID – Enter an appropriate meat ID of the product which is unique.
   1.2. Name – Enter the name of the meat product.
   1.3. Type of Meat – Select the type of meat.
   1.4. Weight(Kg) – Select the weight of the product.
   1.5. Discount – Choose between available or not.
   1.6. Price – Enter price per kg.
   1.7. Add Product(Button) – This button adds the product to the system.
   1.8. Existing Products(Button) – This button shows the products in the system.
   1.9. Back – Takes the user back to previous interface.

2. **Search a Product (Button)** – Takes the user to product search interface where the user can search according to price or the type of meat.
   2.1. Enter the price(Rs) – Enter appropriate price as required to search for the product.
   2.2. Search By Price (Button) – Displays the product information according to user entered price. Only the first matching product information is displayed.
   2.3. Select the type of meat – User can choose between the 5 types of meat to search by type.
   2.4. Search by Type(Button) – Shows the product name of user selected type of meat.
   2.5. Back – Takes the user back to previous interface.
   2.6. Show all products(Button) - This button shows the products in the system.

3. **File(Menu Bar)** – Shows 3 menu bar items: Open, Clear, Exit.
   3.1. Open – When clicked, prompts Yes/No question. Answering 'Yes' opens file navigator which is used to select the appropriate file to import data. Answering 'No' uses default import data. Please carefully select appropriate file as selecting wrong file clears the product table.
   3.2. Clear – When clicked, it clears all the product data, either added or imported.
   3.3. Exit – Closes the program.

4. **Help (Menu Bar)** – Opens the user manual for **Meat Products Information System.**

Thank you for choosing our product!
